

②

June 9th, 1967.

The Honourable Paul T. Hellyer,  
Minister of National Defense,  
House of Commons,  
Ottawa, Ontario.

H. E. J. JOUETT  
EXECUTIVE ASSISTANT

JUN 18 1967

Dear Mr. Hellyer:

It may seem strange for you to receive a letter from an organization dealing with the investigation and research of unidentified aerial phenomena, but we write to you from necessity as we feel this particular subject falls within your office as Minister of National Defense and is of national importance.

As you know, in the past year, more and more Canadians have reported seeing unidentified flying objects (UFO's). They have reported them to the police, the newspapers, radio and television stations, the Air Force, and to our organization. This suggests that people have become quite interested and concerned with this matter. At the present time, Canada has no official investigation being conducted into this phenomenon. For this reason, ② was originally established.

The ② began as a branch of an American-based organization, and because we had conflicting policies, ② formed an all-Canadian, independent organization. We grew from a membership of twelve to a membership of over 1,000 within eleven months. We have been featured in newspaper articles, on radio programmes here in Canada and also in the U.S.

② is a group of serious researchers investigating and analyzing the reports of UFO activity that pour daily into our office. Our members range in age from eleven years to sixty-five years. Our ranks include scientists, engineers, technicians, lawyers, radio announcers, and many other interested citizens.

In the United States, the government has invested vast amounts of money in the U.S.A.F. investigation called Project Blue Book. Because Blue Book was understaffed and was not handling their investigation properly, the U.S. government granted the University of Colorado \$550,000 to conduct a private investigation.

We at ② feel this to be a step in the right direction. We also feel that this country should participate in the investigation. Assuming that the UFO does exist, and our organization has not enough evidence to prove it does, then would the UFO pose a threat to national security? This is a question which must have an answer. Also, the question arises; Does the UFO exist? According to our files, we have only 1% or less cases which are classified as "unknown". This is not sufficient evidence to prove their existence. Naturally, if more people throughout Canada knew of ② then more people could file their reports and perhaps a pattern of UFO

137

②

action could be denoted.

This is where (2) enters the plan. (2) is an established and respected organization in Canada. We will naturally need aid in the way of personnel to carry out the best possible investigations. We cannot be in many places at one time and so we need our best in investigation. We want to ask your Department if you could allow us to use the personnel available to you at the various Armed Forces bases across the country. In this manner, we could send a man out to investigate the report of a sighting anywhere in Canada. The investigation would be carried out immediately and none of the important details would be lost due to the time factor. These men would use a report sheet similar to the one I have enclosed with this letter. This report would then be forwarded to this office for further investigation and analysis. //

The second part of this plan would involve a small subsidy from the Canadian Government. If these reports were to be pouring daily into the office, we would need a permanent office staff of, let's say, two persons — one of (2) Directors and a secretary. We would also require an office with office equipment such as typewriters, filing cabinets, etc. We would also require an offset printing press so that we may publish our findings. Naturally, since this would be Government subsidised, we would have someone from the government, preferably a scientist, as the head of this project. We have worked out only a tentative subsidy price, but we feel it would be in the area of \$20,000.

This, of course is a great deal of money. However, we feel that if we were to head up this investigation, our costs would be a great deal less than if the government set up a Royal Commission to carry this out. If the plan was feasible to the government, and if they so desired, we would change our name to the (2) Commission, for we would be a Commission of sorts.

Let me emphasize this one point; we are not a so called "crack-pot" organization. We believe in the possibility of the existence of UFO's. We cannot say that we believe in UFO's — just in the possibility of their existence. We are attempting to study this phenomenon in a most objective manner. We have accomplished this much; we have proven to ourselves that at least 90% of all UFO reports filed with us are no more than natural phenomena seen under unusual circumstances; also that of the remaining 10%, 9% can be classified as "insufficient data"; however, the remaining 1% must now be classified as "unknown" — this is the area we wish to pursue in our investigation.

If we can establish ourselves as a Commission with the Government backing, radio stations, television stations and newspapers would be only too happy to reveal the address for people to write when they have sighted a UFO. Only in this manner, can we obtain all the sightings. And only in this manner can we draw any definite conclusions.

Our publication will contain the conclusions of many of these sightings — those approved by the department of National Defense. It will also contain many articles dealing with the sciences related to this subject such as physics, biology and astronomy. These articles will be written by the many interested scientists we have found throughout the universities in Canada. One of the main points we shall achieve with the publication will be to send it to the science teachers of all Canadian High Schools and Universities. The teachers and professors could then use the publication as a teaching aid — we have found that most students are interested in this topic; if used properly, the magazine could be used to encourage the student to delve further into the sciences related to this phenomenon. In this way, we could apply for a

success in the field of education.

We feel that this idea has a great deal of merit. Students need some type of incentive, often, to develop their full potential. The future of this country lies in the hands of our future scientists. Perhaps our idea could achieve the end result of attracting more young people to this interesting field.

That about covers our idea and our plea for government aid. We feel, and sincerely hope you do also, that our ideas have merit.

I thank you for the time you have spent reading this letter and hope to hear from you on the matter of its contents in the very near future.

Until then, I remain

SEC VCDS

UNIDENTIFIED FLYING OBJECTS

1. I believe it was agreed at a meeting of the Secretariat last summer, on the proposal of SEC CTS, that correspondence on UFOs would be dealt with by the OPI, at that time Dr. Arnell, SCD/CTS, but signed by SECDS for the CDS, to avoid giving the correspondent an exploitable personal contact in CFHQ. Subsequently, thought I am not sure when, it was agreed that DOPS, specifically CFOC, would be responsible for UFO sightings. Col. Parker, DOPS, seems aware of this arrangement, as indicated in his minute to DGI on 17 Mar.

2. I have spoken to Brig. Doucet who tells me that the Minister's office has replied to this correspondent with the information that the responsible authorities in the Defence Staff will reply directly.

3. If I am correct in my understanding of the procedure on UFOs, will you please arrange to have a brief and non-committal reply prepared in your branch for signature by SECDS for the CDS.

**REQUEST FOR INFORMATION ON  
UNIDENTIFIED FLYING OBJECTS**

Reference (a) V1901-0035/170 (Ints 2-2) L2000-4 dated 23 March, 67.

According to officials of the Science and Technology Agency and reporters of various newspapers who specialise in scientific subject matter the <sup>(2)</sup> is a group of "fanatics" who "should not be taken seriously".

(2)

This is the releasable portion of a record requested under the Canadian Access to Information Act. Notwithstanding any security markings appearing on this record, the information contained herein is no longer classified.

2. In the circumstances it is considered that if the DWD paper enclosed with reference (a) is forwarded to <sup>(2)</sup> he could publish what he considers suitable excerpts in Canadian opinion, to our detriment. Accordingly, unless hearing to the contrary no action will be taken to reply to <sup>(2)</sup> letter. If it is deemed that courtesy requires a reply <sup>(2)</sup> is suggested that a non committal acknowledgment be made from Ottawa which would avoid giving him a personal contact in Japan.

Sent to CTS  
NEW  
File No. 2000-4  
Sent to

Dear Sir,

It is very honored for us to write you here concerned to aerospace development now rapidly increasing forward outer space. As you have been informed, today, UFO(Unidentified Flying Object), so-called flying saucer problems are important subjects of controversy through a lot of world-wide magazines not only in USA but in other countries all over the world.

However, a great tide this time is not negative one, even ②  
consultant of UFO to US Air Force at present became affirmative as shown his special Letter to SCIENCE magazine last year.

For a long time we have been researching for UFOs through photographic, archaeological, astronomical and other scientific methods under the direction of ①  
and then we have a new plan to publish our Special Number of or 100th number since it started, while as 20th anniversary of International Flying Saucer Day, memorial to an epoch-making UFO Incident of ②

incident, occurred over Mt. Rainier, Washington, USA on June 24, 1947.  
The special Number will be the edition de luxe, containing thousands of UFO sightings by person of authority and complete reliability. Accordingly, we would like to ask you something as follows: -

- 1). Have you ever seen Flying Saucers or anything similar ?
- 2). Do you believe they are real objects under intelligent control ?
- 3). Do you believe they are interplanetary ? or others ?
- 4). What are your views on flying saucers ?

Please let us know about your opinion upon UFOs as soon as you could, and at the same time, kindly your portrait with enclosed.

With Best Regards,

Sincerely yours,

②

②

P.S. We are much interested in your opinion, for here in Japan also many aviation pilots and experts of Air Force and civil airliners have been sighting UFOs lately. Jane's ALL THE WORLDS' AIRCRAFT emphasized reality of UFOs answering this question. Immediate reply will be greatly appreciated.

162

2000-4 146-11  
File U.F.O.'s

Ottawa 4, October 14, 1966

Dear ②

I have received your letter of September 21 requesting information on the subject of unidentified flying objects.

As you are no doubt aware, reports appeared in the press last spring concerning U.F.O. which, in turn, resulted in some questions being placed on the Order Paper. Two of these were directed to my Department and the replies given are to be found in Hansard for May 25, 1966 at pages 8496-7.

ANNEX "A"

Some fifteen years ago in order to satisfy a concerned public in both Canada and the United States, scientific committees were set up under defence auspices in both countries to investigate the existing reports. After several years of study, both committees were able to explain all but a very small percentage of the many thousands of sighting reports in terms of natural phenomena and man-made objects.

About five years ago, in an attempt to further the study of optical effect in the upper atmosphere, such as fireballs (shooting stars), and to assist in the recovery of fallen meteorites for scientific study, the National Research Council established a scientific committee, on which the Department of National Defence is represented, to co-ordinate all Canadian activity. One of the prime contributions of this committee has been the improvement of the reporting of fireballs on an organized basis. This is largely through the efforts of members of the Royal Astronomical Society of Canada and other interested amateur astronomers. However, the RCAF has co-operated in this endeavour through the collection of sighting reports made by pilots on night manoeuvres, etc. This method of reporting has been augmented by similar systems operated through the Department of Transport and

163

the Royal Canadian Mounted Police. Although the reports coming through defence channels are primarily for the use of the National Research Council Meteor Centre in maintaining records of fireballs, the individual messages are examined routinely within the Department for any unusual reports. In this way, the Department of National Defence has maintained a partial record of unusual sightings across the country. These reports are carefully studied with a view to determining whether there is any threat to national security involved, or whether any unique scientific information or advanced technology is exhibited which might be significant.

As you can well imagine, in attempting to analyze reports of unidentified flying objects, the investigator is faced with the known unreliability of untrained observers. The police files are full of contradictory evidence of witnesses to such commonplace events as automobile accidents. It is not surprising, therefore, to find doubtful information included in observations of so-called phenomena strange to the viewer. For this reason, the Department of National Defence has been prepared to accept the occasional inexplicable report as due to natural or man-made occurrences, and at the same time recognizing that inexplicable sightings have been reported throughout history without any evidence that the cause was other than natural phenomena.

In the United States the U.S. Air Force is responsible for investigating similar reports. The project office is at Wright Patterson Air Force Base in Ohio.

NORAD keeps very close track of objects of all kinds which enter North American air space but to date none of the reports received by U.S. or Canadian authorities has revealed any threat to national security. In so far as the possibility of extraterrestrial life is concerned, there is at present insufficient information to make a judgment one way or the other.

I hope that this information will be of some help in answering the enquiries you have received.

Yours sincerely,

164

Some fifteen years ago in order to satisfy a concerned public in both Canada and the United States, scientific committees were set up under defence auspices in both countries to investigate the existing reports. After several years of study, both committees were able to explain all but a very small percentage of the many thousands of sighting reports in terms of natural phenomena and man-made objects.

Your Ref: L 2000-4 TD 6154P (CTS)

FLYING SAUCERS (UFO's)

Dear Sirs,

I thank you for your letter of 23rd August, 1966, and observe that you disagree with me as to existence of extraterrestrial beings in the Earth environment. However, I observe that apparently you do not disagree with the existence of extraterrestrial beings outside the Earth environment. Therefore, depending on our views, whether the extraterrestrial beings exist inside or outside the environment may rest only on a technicality. It is not really important where their existence is actually situated as long as their thoughts are reaching us and we are in a position to and are willing to pay sufficient attention to them.

As proposed I have today forwarded copy of my letter of 23rd June, 1966, to the Secretary of State for External Affairs, Ottawa.

Yours very truly,

The Honourable Paul J.J. Martin, Q.C., M.P.,  
Secretary of State for External Affairs,  
Parliament Buildings,  
Ottawa, Ont.

PEACE FOR OUR WORLD

Sir,

I prepared a letter dated 23rd June, 1966, addressed to  
Department of National Defence, Ottawa, asking a Basic  
Question as follows (on page 11):

" If sufficient documentation can be produced  
" to prove that people of higher civilization  
" live on one or more planets outside our Earth  
" within or beyond our solar system, will  
" people in the Canadian Government be willing  
" to accept it and will they be sufficient,  
" quantitative or qualitative speaking, without  
" fear and prejudice to instigate research on  
" the space people's mission, if any, here on  
" Earth, and will they be willing to implement  
" its findings to reach all people on Earth  
" irrespective of the consequences as long as  
" it is founded in full trust that the human  
" race will be saved from complete annihilation?

The question has been brought forth in my serious studies  
of Flying Saucers (UFO's). \*)

The Department of National Defence in their reply of 23rd  
August, 1966, proposed that I address myself to the  
Department of External Affairs in persuing my views on  
peace.

169

I now therefore ask you and your External Affaires  
Department to please place the above Basic Question under  
consideration in the light it deserves.

I enclose copy of the above two letters with enclosures  
and request you, in due course, to kindly inform me how  
the content of this letter will be or has been dealt with.

I have the honour to be, Sir,  
Your obedient servant,

②

- \*) May I refer you to the excellent publication of long  
standing called Flying Saucer Review which is subscribed  
to by many embassies and prominent people.

1 See D's 2

This subject in the past has been dealt with on an ad hoc basis by Mr. Powell as Security Deputy CTS. On transfer to D of Organization he has asked Mr. Greenwood of D C Ops to monitor UFO situation.

We in turn have recommended to KCJS that D Ops be organized to deal with the occasional report requiring follow up investigation.

No action is required on this letter except to check the file to see if we should advise External Affairs of ② previous dealings with this Department. Will you please do so.

FLYING SAUCERS (UFO's)

Dear Sirs,

I thank you for your letter of 23rd August, 1966, and observe that you disagree with me as to existence of extraterrestrial beings in the Earth environment. However, I observe that apparently you do not disagree with the existence of extraterrestrial beings outside the Earth environment. Therefore, depending on our views, whether the extraterrestrial beings exist inside or outside the environment may rest only on a technicality. It is not really important where their existence is actually situated as long as their thoughts are reaching us and we are in a position to and are willing to pay sufficient attention to them.

As proposed I have today forwarded copy of my letter of 23rd June, 1966, to the Secretary of State for External Affairs, Ottawa.

Yours very truly,
